The News.

We have some farther election returns this morning. Language, Democrat, is probably elecred in the 2d District. In the 2d District WAREsens is undenbuelly re-cleated by a large majoricy. His opponent, Judge Dunn, is one of the mest ropular men in Wisconsin, but he is a loyal adherent of the National Administration .-The Democrats have elected a member of Congress in Michigan by one hundred mejority over the Republican candidate, in the lat District .--The Republicans bave carried the State ticket in Michigan by 10,000 majority, and in both branches of the Legislature they are two to one to the

Democrats. In the New York market flour is reported a triffs lower, while wheat is firmer, and corn 2 to 3 cents higher. Our own market, yesterday, was quiet, receipts being very light, in consequence of which No. 1 spring went up about 1 cent. Such a configuration of wet weather as we are now baving we scarcely ever remember. It rained pretty much all day yesterday, and the clouds still bear a decidedly bydraulic appearance. The roads and streets are in a terrible condition. Second Congressional District.

An antique apportionment law, based upon facts which ceased to be facts eight years ago, has given Mr. Doughas a majority in both branch—es in the Legislature; but there is no room for doubt that the Republican State tickst is handsomely elected. In spite of the Senator's seeming triumph, it is true that the people have pronounced against him; it is true that Mr. Lincoln, though beaten, has gained the popular verdict. THE CREMPTON RULED OUT.—Notwithstanding he challenge published by HERRAN, MORRISSET persists in his determination not to onter the ing again. In England, a man who claims to bo the champion, is obliged, by the circumstances of his position, to fight any man who challenges him for \$500. The rules of the ring in that country are arranged by a pugilistic as socistion. In this country, we are glad to say, no such institution exists; but by common con seat, fighting men are governed by the London rules. The related of Monniesky to light, therefore, puts him out of the ring, and leaves the bampioaship open for other contentants.

The prospects for the completion of the road to Glen Bankh, this season, are encouraging.—
Arrangements have been concluded for the purchase of iron sufficient for that purpose, and one cargo is now on the way here, with two extra passenger cars—built at St. Albans, Vt., at a cost to the manufacturers of \$3,000 each—and a number of freight errs. Terrible Affair—The President Suppose His Paper—The Editor's Agent.

In a speech at Camden. New Jersey, a few days slues, Col. Eceney said:

Now, gentlemen, I have a most meleuchely aunouncement to make in this connection. It is that the newspaper, The Press, is stopped—my Press is stopped! (Sensation.) I did not expect in coming here, to be compelled to make this socrowful announcement; but it is nevertheless the fact. The Press is stopped—not the establishment, but the single copy which the President of the United States takes; it is stopped. (Long continued should of laughter.) I suspect I shall survive it. (Renewed laughter.) I have no doubt I shall survive it. But it was a terrible blow. I do not think ever two conts created so much haven before. But we shall recover; we shall get over it. And now for the right part of the story; I shall receive, in a few days, sluest the only dollar that I here are a vestwaf from the Nederal Acquinitation. in a few days, elmost the only delias that I have ever received from the Federal Administration—

which will be about \$7 50 in payment for The Press. (Laughter.)
So we see that this proscription runs from great to small. To attacks a popular tribune, and it strikes down a newspaper. It turns out a postmaster, and retuces to pay two cents to an independent journal:

"To such base uses must we come at last," Thus we see the Administration of the Federal Government, presiding over thirty millions of paople, with all its vast patronage, with all its great power, forgetting all its duties and all its pledges, and becoming a party to the petty pro-scriptions which village politiciate would despise, and which honorable mon would laugh at.—.

We have a majority on every officer, in every town in the county, except in Troy, where the Democratic candidate for Assembly has a mojority of 10. The Republicans of Walworth set a noble example to their fellow-Republicans throughout the State. Every town was thoroughly organtand and diligently canvassed. You will perceive that Intrabee's majority is larger in Mennsha than is naturally should be, and Billinghurst's smaller than it should be, but you will no doubt be anxious to know what caused all this. It was caused by Harrison Reed and his faction trading Billinghurst off to make votes for their independent candidate for Senator, We have lost one member to the Assembly, also through the came source.

Dr. Shelton McKenzie has disting the scheme for a proposed emendment to the present law, aixing at discrimination between public and private libel. The movement has originated in the attempted prosecution of Frank Lesile in the swill milk campaign, and the action of the grand jury to throwing out the bills against him, supplies a powerful argument in laws of the brooked change. The Piccolomania is strong upon us—and no wonder. He, indeed, must suffer from ossification of the heart, who is not captivated, enthralied, by the bewitching dead! Your correspondent arows his ensistence thought! In her pondent arows his ensurement bounty! In her presence one forgets all nebut singing—all shout etage glitter and choral tiner!; you can see nothing but Piccolomini. It is not necessary to hear hor—for she sings with her eyes, with the tips of her fingers, with the bearings of her most royal boson! In fact, she looks like un incarnate song. Curiously enough, (when the facial contortious of most great vocalists are remem-bered.) Mdlie Piccolimini grows infinitely more besettled.) Molie Procolomici grows infinitely more beautiful while singing than when her features are at rest. The growd which witnessed La Traviata lest right, was scarcely less than that on the opening performance. Resolutions were then adopted instructing the engineers to complete the curveys immediately to a connection with the Minneapolis acid Codar Valley Rail Road, and locate the line at as early a date as possible.

The Engineer's and Secretary's reports were then discussed at some length. The Resident Engineer's reports bows that the grades and curvatures of this line, are very light compared with other lines that have been servoyed westwards from the Mississippi river, the maximum grade being 45 feat per mile, for a distance of two miles on reaching the main ridge between the Lowa and Yellow rivera, the grades are light, varying from 10 to 15 feet per mile. There is but little curvature, the amount of work is extremely light, the grade line being near the curface of the ground the whole distance. These are important points which cannot be brought forward in layor of any other route in Clayton or Alim, makee counties, and abows it at once to be the obseptest and easiest Rail Road line that can be built in northern I lows.
